Snatch block
for Oceanographic / Research Vessel

- **Designed for easy reeving,** as one of its side plates can be opened while the block is hanging.
- **Available in a wide range of types and configurations,** optionally equipped with: following arms, counterweights, load cells, and payout sensors
- **Composite Sheaves:** Lightweight and corrosion-resistant solution, ideal for marine environments. Optimal solution for cables, umbilicals, and tethers.
- **Compatible with shackles, pad eyes, and swivels for flexible installation.**
- **Designed with no loose components** and manufactured in accordance with **SfS Recommendation 024E/2018**, for safety in offshore applications.
- **Can be either selected from standard items or custom-made**
